

“Our purpose is to be a trusted, independent advisor and advocate for vegetation fire management, providing advice to Government and supporting the community for fire management activities in Tasmania”

Communication and Collaboration

- Communicate and engage to enable information sharing between FMACs and SFMC
- Collaborate and advise on vegetation fire management planning and risk management with FMACs and TFS bushfire risk planning
- Influence the importance of mapping data and support the Fire Management Practice Working Group

Policy and Advice

- Provide advice for legislative application and change
- Continue to advise on vegetation fire management at the landscape level
- Provide global horizon scanning information for fire management activities within Tasmania

Community Capacity and Awareness

- Coordination of the Fire Management Area Committees (FMACs)
- Support the Red Hot Tips program
- Continue to act as an external, consistent and steady voice to the community, making information accessible and available and supporting the use of fire in the landscape

Research and Innovation

- Collaborate with insurance agencies on bushfire risk
- Advocate adaptive and proactive fire management approaches promoting data, science, systems and technology
